

QUESTIONARIO 10

1. I sistemi di pianificazione e programmazione nel dlgs n. 50/2016 e loro connessione con gli strumenti finanziari dell'ente. La gestione della spesa per investimento e la correlazione con il piano delle alienazioni.
2. Il partenariato pubblico privato.
3. Che differenza c'è tra la copia informatica di documento analogico e la copia per immagine su supporto informatico di documento analogico e in che modo le posso ottenere?

Buildings have an impact on long-term energy consumption. Given the long renovation cycle for existing buildings, new, and existing buildings that are subject to major renovation, should therefore meet minimum energy performance requirements adapted to the local climate. As the application of alternative energy supply systems is not generally explored to its full potential, alternative energy supply systems should be considered for new buildings, regardless of their size, pursuant to the principle of first ensuring that energy needs for heating and cooling are reduced to cost-optimal levels. The objective of cost-effective or cost-optimal energy efficiency levels may, in certain circumstances, for example in the light of climatic differences, justify the setting by Member States of cost-effective or cost-optimal requirements for building elements that would in practice limit the installation of building products that comply with standards set by Union legislation, provided that such requirements do not constitute an unjustifiable market barrier.
