Key measures for the green transition: Italy's recovery and resilience plan supports the green transition with key investments in energy efficiency in residential and public buildings (15 billion euros), sustainable mobility (34 billion euros), and development of renewable energies and the circular economy and improvement in waste and water management (11 billion euros). Those investments are accompanied by important reforms aimed at improving the efficiency in the use and management of water resources and local public services, implementing charging points for electric vehicles, increasing competition in the electric market, improving the functioning of concessions in Italian ports or simplifying the various legal frameworks for the acceleration of energy efficiency interventions and transport infrastructure projects.
